

**SAFETY SHIELDS & EXTENSOMETERS**

## SAFETY SHIELDS

Optional safety shields are available for all motorized test frames. On FMS, MMS, FMD, and MMD models safety shields include an interlock, prevent tests from being run when the shield is open. All shields are constructed with aluminum frames and shatter-resistant aerospace acrylic.

Safety Shields		
Model No.	Description	Interlocks
FMM-S-SHIELD	FMM Safety Shield Short	No
FMM-SHIELD	FMM Safety Shield Standard	No
FMM-X-SHIELD	FMM Safety Shield Extended	No
FMS-1000 SHIELD	Safety Shield FMS-1000	Yes
FMS-2500 SHIELD	Safety Shield for FMS-2500 & FMS-5000	Yes
MMD-SHIELD	Safety Shield for MMD & FMD Test Frames	Yes

## EXTENSOMETRY

Starrett offers a full range of contact-type extensometers. Our systems are compatible with Reliant Technologies® and Epsilon® extensometers and feature automatic identification of model and measuring range.

Starrett MMS and MMD material test frames may be used with extensometers. Starrett L3 systems may use extensometers from Reliant Technologies and Epsilon Technology Corporation.

Extensometers are customized so that they are automatically recognized by the L3 system. Selecting the Extensometer symbol will display key characteristics of the instrument including measuring range.
