

Identify. Align. Measure.

Modern measurement technology should enable users to cut down on manual tasks and focus on value-added work. EYE-D automates measurement inspection, boosting operator efficiency. Simply place the part on the table and let EYE-D do the rest.

EYE-D is the perfect tool for saving time in your manufacturing operations.

Automate Measurement Inspection

EYE-D recognises the part, performs the alignment and begins the measurement routine.

Optimise Operator Productivity

EYE-D eliminates the need for operators to perform manual alignments, increasing inspection throughput.

Reduce Operator Training

Operators do not need metrology software training to execute measurement routines.
